

CERTIFICATE OF THANKS AND RECOGNITION

This is to thank and congratulate you for developing strategies for teaching science and other subjects via a unit of coursework with the Epistemic Insight Initiative.

Name:

The Epistemic Insight Initiative is investing in the nation's teachers of the future – by giving older students some essentials of teacher training. For example, we worked with the Discipline Wheel to design a session about a big question that bridges many disciplines. We also designed ways to teach about the importance of observation in scientific enquiry as a way to generate and test ideas about how the natural world works.

Signed

Professor Berry Billingsley
Professor of Science Education
Canterbury Christ Church University

Date: 14 April 2020
